

Pedestrian RSA Prompt List

- ⇒ Are sidewalks provided on both sides of the street?
- ⇒ If no sidewalk is present, is there a walkable shoulder?
- ⇒ Is the sidewalk width adequate for pedestrian volumes?
- ⇒ Is there adequate separation between vehicles and pedestrians?
- ⇒ Is sidewalk vs street discernable to people with visual impairments?
- ⇒ Could you make this journey in a wheelchair? A walker or cane?
- ⇒ Are there obstructions in the walkway? (paper box, street furniture, etc.)
- ⇒ Is the walkway well-maintained?
- ⇒ Are there gaps or discontinuities in the sidewalk?
- ⇒ Can you get to the ped buttons at a signal without leaving sidewalk?
- ⇒ Can peds see cars and cars see peds?
- ⇒ Are vehicle speeds appropriate? Right turning vehicles?
- ⇒ Are marked crossings clearly marked?
- ⇒ Are crossing locations in the right place?
- ⇒ Are transit stops in the right place (crossing location)?
- ⇒ Are there “cattle trails” that should be improved?
- ⇒ Are the sidewalks connected to ped destinations?
- ⇒ Are there driveways with pedestrian crossing issues?
- ⇒ Are there conflicts between bicycles and pedestrians?
- ⇒ Do pedestrians need to be channelized to cross at a specific place?
- ⇒ Do pedestrians need to be discouraged from crossing at a place?
- ⇒ Does the lighting adequately light the pedestrian paths and crossings?
- ⇒ Are there shadows in the lighting from trees or other obstructions?
- ⇒ Are the roadway signs clear and visible day and night?
- ⇒ Do vehicles know where to expect pedestrians?
- ⇒ Are drivers looking for pedestrians?
- ⇒ Are pedestrians taking unnecessary risks to cross the road?
